📍 Makati, Philippines

01 / PROFILE

Front-end developer and UI/UX designer with 10 years of experience building fast, polished interfaces for learning platforms, healthcare, and e-commerce. Currently developing the client portal and LMS at Cursum A/S (Denmark) while delivering freelance design-and-build projects for clients in the Philippines, Denmark, and the US. Strong in modern JavaScript (React/Next.js, Vue/Nuxt), design systems, and the full UI/UX cycle from research to usability testing.

02 / EXPERIENCE

Web Developer — Cursum A/S

SEP 2018 - PRESENT

- Develop and maintain front-end features for the company's client portal and learning management system (LMS), including new functionality, refactors, and a shared design language.
- Modernized legacy user flows using ASP.NET, HTML5, and SCSS, ensuring cross-browser and cross-device compatibility to strict quality standards.
- Designed and delivered custom, mobile-first WordPress themes supporting marketing initiatives.
- Produced graphic assets for blog content and marketing collateral.

Developer & Designer — Freelance

NOV 2018 - PRESENT

- Design and develop custom WordPress themes, landing pages, and checkout flows for clients in the Philippines, Denmark, and the US.
- Lead the end-to-end UI/UX process in Figma: user research, wireframing, prototyping, and usability testing.
- Provide ongoing maintenance covering performance optimization, SEO, and security updates.
- Create brand identities including logos, style guides, and lightweight design systems.

Front-End Web Developer — Greatfeat Services Inc.

DEC 2017 - JUL 2018

- Translated UX wireframes into responsive, pixel-accurate production features using HTML5, CSS3, and JavaScript.
- Contributed to migrating the company website to Vue.js, Nuxt, and SASS, improving page performance and user experience.
- Participated in code reviews to maintain front-end consistency and code quality.

Software Engineer — Medilink Network Inc.

OCT 2015 - DEC 2017

- Redesigned the product UI with a custom responsive CSS grid system, improving usability across devices.
- Built interfaces and prototypes for healthcare web applications using Elixir, Phoenix, HTML5, and SASS.
- Implemented real-time messaging with WebSockets and developed a 3D Google Cardboard (VR) experience for Android using Unity.
